CORONA LANYARD

REF: SP3-124

1. FILM BEING FORWARDED TO [ ] FOR RETURN TO SE.

2. NONE OF THE M BLOCKS ARE SATISFACTORY. INNER ROW BETTER THAN EDGE ROW. VARIES FROM BEST AT 0.6 FULL DEVELOPMENT TO POOR-EST AT 0.0 PRIMARY. DOTS ARE NOT UNIFORM IN DENSITY WITHIN A SINGLE DOT OR FROM DOT TO DOT. MOST ARE TOO THIN. BLOCKS ON RECENT MISSIONS MUCH SUPERIOR TO THESE DOTS OF TEST.

3. L TEST BETTER THAN M TEST MATERIAL, HOWEVER NOT GOOD. MANY WEAK DOTS WHICH LEAD TO UNCERTAINTY AS TO WHETHER LIGHT WAS ON OR NOT. SOME DOTS BRIGHT BUT VERY RAGGED WHICH CAN CAUSE READER PROBLEMS. THE 0.6 DENSITY BETTER IN GENERAL THAN 0.3 RUN.
